Grant for Young Members attending IABSE international conferences.

The Executive Committee of the British Group of IABSE has approved a new initiative to encourage Young Members to attend international conferences organised by IABSE. This initiative was approved by the Committee on 19th November 2015.

A Young Member (being an Individual Member of the British Group under the age of 35) who has a paper accepted and presents it, either orally or as a poster, at an IABSE international conference will be eligible to receive a grant of £300 towards the cost of attendance.

By providing some modest financial support to Young Members in this way, IABSE hopes to enable some young people to attend an international conference who might otherwise not be able to go.

This facility is only open to all Young Members of the British Group of IABSE, and provides yet another incentive for young potential members to join IABSE and thereby enjoy this and other benefits of IABSE membership.

An individual Young Member may only receive this grant a maximum of two times, and a Young Member may only receive a single grant for any particular conference, even if he/she presents more than one paper.

How to apply:

1. Upon receipt of notification from the conference organisers that your paper has been accepted for presentation (whether orally or as a poster), inform the British Group Treasurer (see contact details below) of the fact and of your intention to attend the conference to submit the paper.
2. After the conference, submit the following to the Treasurer of the British Group:
 - an extract from the final programme showing your paper,
 - evidence that you actually attended the conference to present your paper,
 - a copy of your final published paper from the proceedings,
 - name and address to which a cheque for the grant money can be sent.

Forthcoming international conferences:

Details of forthcoming international IABSE conferences can be found in the International Events section of our web site www.iabse.org.uk/events or go straight to the main IABSE web site: www.iabse.org.
